Dates of Internship and Hours of Work
Internships require 120 hours of student work for 3 hours academic credit during the course of the semester. This is approximately 10 hours a week during the Fall and Spring. Summer internships tend to vary more due to the nature of the term. If your internship will require students to work significantly more than 10 hours a week or will be expected to work additional hours beyond the 120 hours required by the Arts Management Program, please include that information here.

Internship would be 8-12 hours per week and run the course of a full semester.
Passion for the art world.

Desire to think originally and creatively, implement their own ideas, and oversee their application in a real world scenario.

Willingness to openly communicate their thoughts and both express and receive constructive criticism.

Interest in participating in the growth and outreach of a local art centric business.

Belief that they can make their life whatever they want it to be and motivation to see their dreams through to reality.

It is of no concern to me if the intern has previous experience in these areas or not, either are suitable to me. It is more important that they have ideas, motivation, and a desire to try out their own approach.

Imaging Arts Printing is a small, local, quality centric printing business. We print for professional photographers and painters reproducing paintings yet also for the common person who has any photo or art work they’d like to look nice hanging on their wall. We are in the process of growing and reaching out to the community around us and this is where the intern would come in.

The intern would assist with general daily or weekly marketing and managing activities such as updating blog posts and social media in a way targeted to the growth of the business. They would also have the opportunity to be creative and come up with original ways to reach out to the community, implement those ideas, and adjust as needed, having control over their own approach.

Being able to print very high quality images, we are also looking to expand our services so that someone who does not have their own photo or art to print can purchase one from us, or the work of artists associated with us, and have it printed to hang on their wall through our website (which is currently being rebuilt). The intern would have the opportunity to be part of that expansion, giving input as to the development, and helping in spreading the word that the art is there and available for purchase.

If they desire the intern can also learn about the process of high quality canvas printing, coating, and stretching as well as printing on a variety of fine art papers.
** LEARNING OUTCOMES**

** Students are required to identify goals and desired learning outcomes for their internship. Please list those specific skills that an intern will have the opportunity to learn while working with your organization.
